

Bring Your Own Device

In 2018, we are once again encouraging Year 5 and 6 students at Methven Primary School to bring their own device for their learning. We see the ability to transition from working at school to home as an important step in our students development.

As an Office 365 school, having a computer that can have the Office Suite installed is important, especially OneNote. This is a free download from your child's MPS O365 account, which we can help with at any time.

The computer market is very confusing and is inundated with so many choices. To assist you, Cyclone Computers (our school's ICT company) have developed a website that promotes a range of devices which fit our school's criteria covering different price brackets for some guidance. If you visit their website you can view detailed information regarding the below models. (Note: Any changes in pricing will be updated on the website).

<https://byod.cyclone.co.nz/methvenprimary>

Login: methvenprimary

Username: mpbyod

Please feel free to shop around for the best price. Cyclone's advertised pricing will always include a 3 year warranty which is important to note. You may be able to find the same device for a cheaper price elsewhere, but you will need to check with the retailer regarding the warranty.

If you have further questions regarding device specifications, we would strongly recommend talking to Kim at Cyclone Computers 0800 686 686 (ChCh).

Lenovo N24 Yoga Convertible
w/ 3yr Warranty + Stylus Bundle

\$599.00 Inc GST
